Handout 5: Count by hand

REMUS

Count by hand. Day 6, period 2. Team name: _____

White to move: a king on e1 and a pawn on e2 against a lone Black king on e8.

1. Write every move White can make, one per index card, and copy the list here.
2. On each card, list every reply Black would have after that move and write the count under the list.
3. Add the counts across the cards.

Card	White's move	Black's replies	How many
1			
2			
3			
4			
5			
6			
7			
8			

Positions one ply deep (the number of cards): _____

Positions two plies deep (the sum of the last column): _____

`perft()` printed, at depth 1: _____ and at depth 2: _____

How many cards would you need to count three plies deep? _____
