# Handout 6: The game tree

REMUS

**Paper minimax. Day 8, period 1.** Team name: _____

White moves at the root and may choose A, B, or C. Black then chooses one of three replies, and the number under each reply is how good the position is for White at the end (bigger is better for White). Fill in each Black box with the score Black will settle for, then fill in the root with the score White can count on, and circle the move White should play.

Why can White not count on the 9?

_____

**Fewest flips. Day 8, period 2.** Cut the nine cards below apart and lay them face down in the same order as the tree: group A on the left, then B, then C, with the left card of each group nearest the group letter. Turn cards over one at a time, left to right, and stop a group as soon as nothing left in it could change White's choice. Count your flips.

| A, card 1 | A, card 2 | A, card 3 |
|---|---|---|
| **4** | **6** | **5** |

| B, card 1 | B, card 2 | B, card 3 |
|---|---|---|
| **2** | **9** | **7** |

| C, card 1 | C, card 2 | C, card 3 |
|---|---|---|
| **3** | **8** | **8** |

Flips: _____ Move chosen: _____

Your stopping rule, in one sentence:

_____
