Handout 7: The hidden peak grid

REMUS

Find the hidden peak. Day 10, period 1. Team name: _____

A 10 by 10 sample hides one hot spot. Each round, call out a square as `(row, col)`. The teacher reads you the value measured there, and you write it in the square. After five readings, mark the square you think is the peak with a star.

row	0	1	2	3	4	5	6	7	8	9
0										
1										
2										
3										
4										
5										
6										
7										
8										
9										

Round	Square `(row, col)`	Value	Why this square?
1			
2			
3			
4			
5			

Your guess for the peak: `( , )`

Did you choose your last square to explore (far from every reading) or to exploit (next to your best reading)?

_____
